Programming Languages & Frameworks: Java, JavaScript, Python, HTML, CSS, PHP, C, Assembly, SQL, Vue.js, React.js, Spring Boot MVC, Tailwind CSS, jQuery, AJAX, JSP, Thymeleaf, Statamic CMS

Tools & Platforms: Git, Docker, AWS, Linux Ubuntu, Cisco, Postman, Visual Studio, Netbeans, Eclipse, PyCharm, MySQL Workbench, Jupyter Notebook

Languages : English (Fluent), Malay (Native)

EXPERIENCE

Web Developer Intern

April 2025 - August 2025

Lendela

Kuala Lumpur, Malaysia

- Contributed to the development of key public-facing pages (blogs, articles) for the company's content hub using Antlers/HTML, Tailwind CSS, and Statamic CMS, which resulted in a **10% increase** in user clicks to the loan application form through the CTA buttons.
- Developed an interactive debt consolidation calculator providing users with clear, data-driven financial insights for informed decision-making. This project focused on responsive design and SEO optimization.
- Established the structural foundation for the CMS content module, including folder structure and partials. Contributed to an Agile team of 10+ people, and mastered industry frontend terminology.

IT Intern

November 2023 - January 2024

Revotek Sdn Bhd

Kuala Lumpur, Malaysia

- Created an MVC application using Spring Boot with input validation, image upload, and dynamic forms features.
- Standardized front-end components using reusable Thymeleaf fragments, ensuring design consistency with UI/UX specifications.
- Gained practical experience with AWS, Git, and Docker for containerization and version control.

PROJECTS

Reading Tracker | PHP, JavaScript, MySQL, Postman

November 2024

- Constructed a RESTful web application using PHP and JavaScript, leveraging Postman for API testing and MySQL Workbench for database management, focusing on backend functionality.
- Introduced core features including real-time reading progress tracking, dynamic book ratings, and a comprehensive admin panel.
- Developed a responsive and user-friendly frontend interface using Bootstrap, enhancing user engagement and product usability.

Sleep Disorder Prediction Application | Python, Pandas, Tkinter

October 2024

- Developed and trained a scikit-learn based machine learning model, achieving **94% prediction accuracy** for sleep disorder likelihood using user health data.
- Leveraged Pandas DataFrames for comprehensive data cleaning, and preparation to ensure a robust and structured input for effective model training and prediction.
- Designed and built a user-friendly application interface using the Tkinter GUI library in Python, enabling users to input data and receive real-time prediction results.
